

24.5-31GHz 360Degree Analog Phase Shifter

Description:

The AT-APS-2531-360 is an Analog Phase Shifter which is controlled via an analog control voltage from 0 to +14V.

It provides a continuously variable phase shift of 0 to 360 degrees from 24.5GHz to 31GHz with consistent insertion loss versus phase shift. The phase shift is monotonic with respect to control voltage.
